                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      | RELATING TO THE REGISTRATION OF

# BIRTHS, MARRIAGES AND DEATHS

IN THE

# PROVINCE OF ONTARIO

FOR THE

YEAR ENDING 31st DECEMBER

1940

(BEING THE SEVENTY-FIRST ANNUAL REPORT)

PRINTED BY ORDER OF
THE LEGISLATIVE ASSEMBLY OF ONTARIO
SESSIONAL PAPER No. 13, 1941

OHIANO

TORONTO
Printed and Published by T. E. Bowman, Printer to the King's Most Excellent Majesty
1942

SIR:

I have the honour to submit for your approval the Seventy-first Annual Report made in conformity with and under the provisions of the Act respecting the Registration of Births, Marriages and Deaths in the Province of Ontario, for the year ending December 31st, 1940.

I have the honour to be, Sir,

Your obedient servant,

F. V. JOHNS,

Deputy Registrar-General.

To the Hon. H. C. Nixon,

Registrar-General of Ontario.

To His Honour the Lieutenant-Governor of the Province of Ontario

MAY IT PLEASE YOUR HONOUR:

I herewith beg to present for your consideration the Seventy-first Annual Report of the Registrar-General, relating to the Registration of Births, Marriages and Deaths in the Province of Ontario during the year 1940.

Respectfully submitted,

H. C. NIXON,

Registrar-General of Ontario.

#### Of these infant deaths:

745 or 25.17 per cent. lived less than one day.
716 or 24.19 per cent. lived less than one week.
344 or 11.62 per cent. lived less than one month.
407 or 13.75 per cent. lived less than three months.
386 or 13.04 per cent. lived less than six months.
208 or 7.02 per cent. lived less than nine months.
153 or 5.17 per cent. lived less than one year.

INFANT MORTALITY IN CITIES, TOWNS AND VILLAGES OF 10,000 AND OVER. ONTARIO, 1936-1940.

#### **SUICIDES**

In 1940 there were 340 suicides. The rate per 100,000 of population was 9.0, just 0.5 less than for 1939.

Of these, 243 or 71.47 were males and 97 or 28.52 females.
